

PSYCH 260/BBH 203

Neuroanatomy I

Rick O. Gilmore

2022-01-25 14:26:08

Prelude (3:24)

[\(Neural Academy, 2020\)](#)

Prelude (2:01)

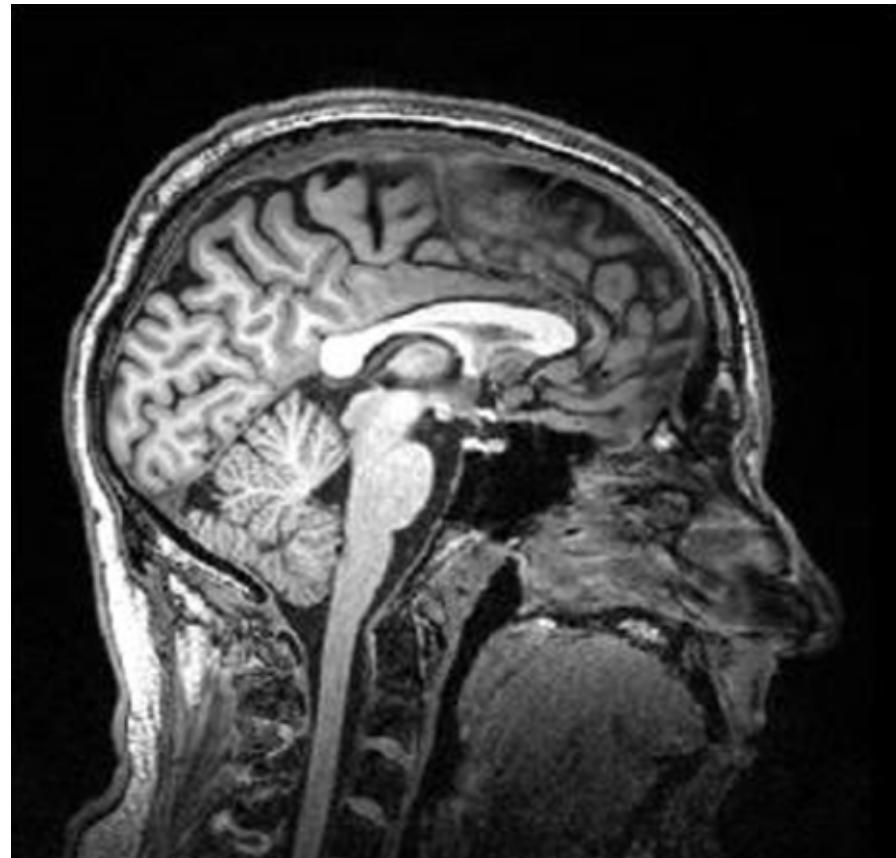

(Kids Learning Tube, 2015)

Today's topics

- Announcement: Quiz 1 next Thursday (online via Canvas)
- Warm-up
- Wrap up on functional methods
- Neuroanatomy
 - Through song and dance

Warm-up

What kind of brain imaging technique does this image represent?

What kind of structural brain imaging technique does this image represent?

- A. Magnetic Resonance Imaging (MRI)
- B. Positron Emission Tomography
- C. Event-related potentials (ERP)

What kind of structural brain imaging technique does this image represent?

- A. Magnetic Resonance Imaging (MRI)
- B. Positron Emission Tomography
- C. Event-related potentials (ERP)

Which of the following functional methods has *temporal* resolution on the order of seconds?

- A. functional MRI
- B. EEG
- C. MEG
- D. single-unit recording

Which of the following methods has *temporal* resolution on the order of seconds?

- A. functional MRI
- B. EEG
- C. MEG
- D. ~~single-unit recording~~

Which of the following methods has high/fine *spatial* resolution?

- A. functional MRI
- B. PET
- C. EEG
- D. single-unit recording

Which of the following methods has high/fine *spatial* resolution?

- A. ~~functional MRI~~
- B. ~~PET~~
- C. ~~EEG~~
- D. single-unit recording

Which measure(s) would you use to map connections between brain areas?

- A. retrograde/anterograde cell tracers
- B. diffusion tensor imaging (DTI)
- C. PET neuroimaging
- E. both A & B.

Which measure(s) would you use to measure connections between brain areas?

- A. retrograde/anterograde cell tracers
- B. diffusion tensor imaging (DTI)
- C. ~~PET neuroimaging~~
- E. both A & B.

Wrap-up on functional methods

- Link to lecture on functional methods

Neuroanatomy

Brain anatomy through dance

Finding our way around

Anterior/Posterior

Medial/Lateral

Superior/Inferior

Dorsal/Ventral

Rostral/Caudal

Finding our way around

Anterior/Posterior -> front/back

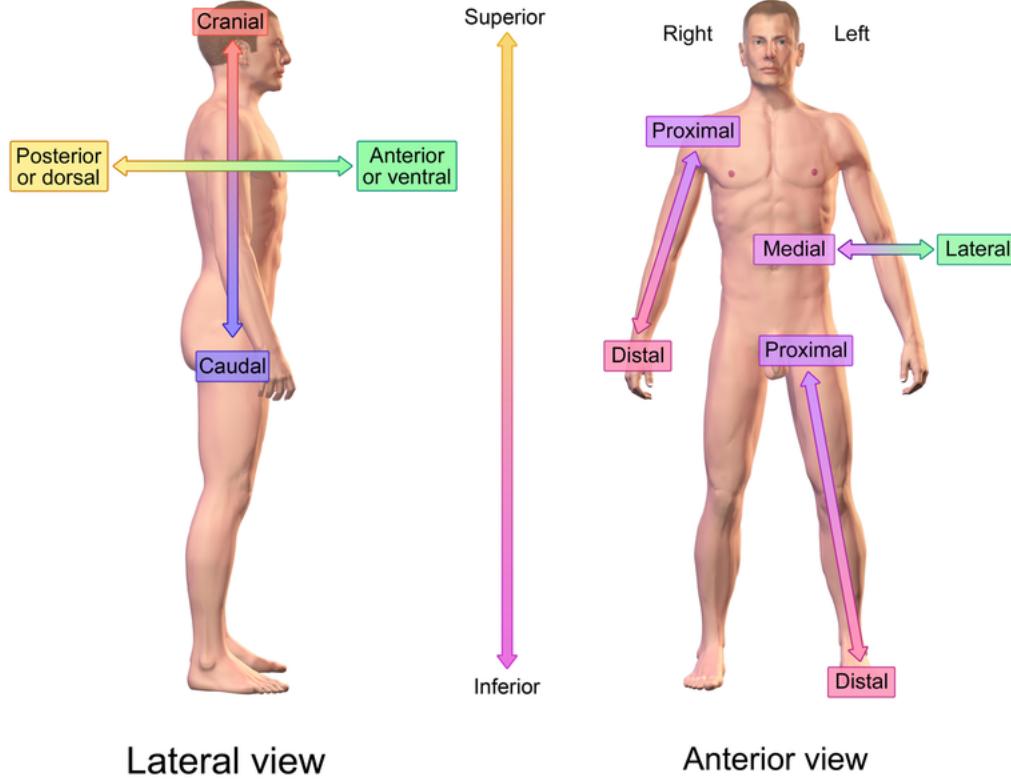

Medial/Lateral -> inside/outside

Superior/Inferior -> upward/downward

Dorsal/Ventral -> back-ward/belly-ward

Rostral/Caudal -> head-ward/tail-ward

Directional image

Lateral view

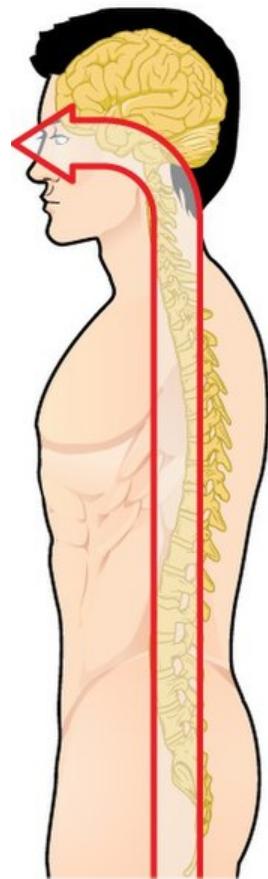

Anterior view

Directional References

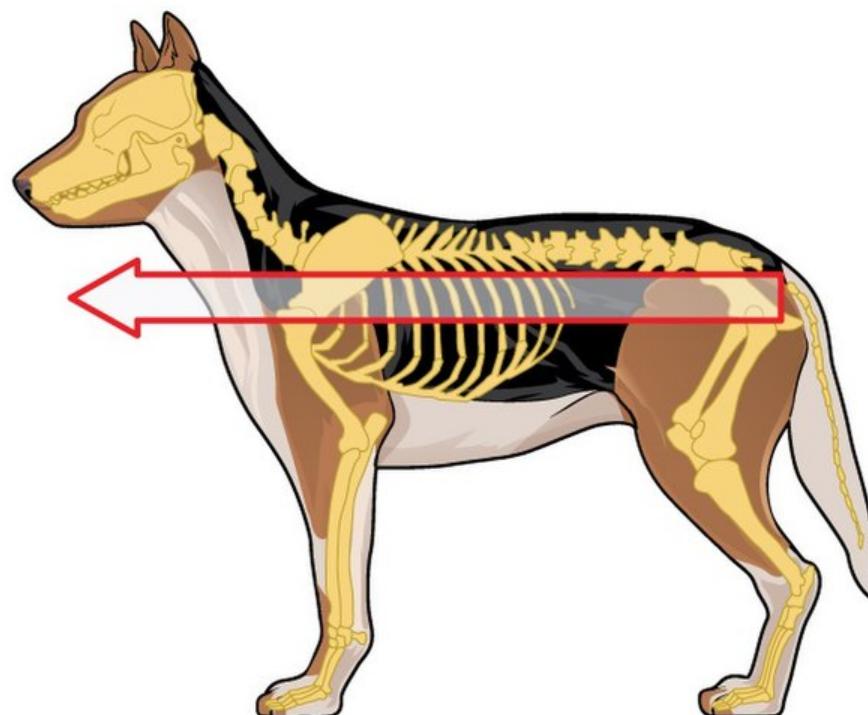

Wikipedia

Bipeds vs. quadripeds

Human (bipedal)

Dog (quadrupedal)

Wikipedia

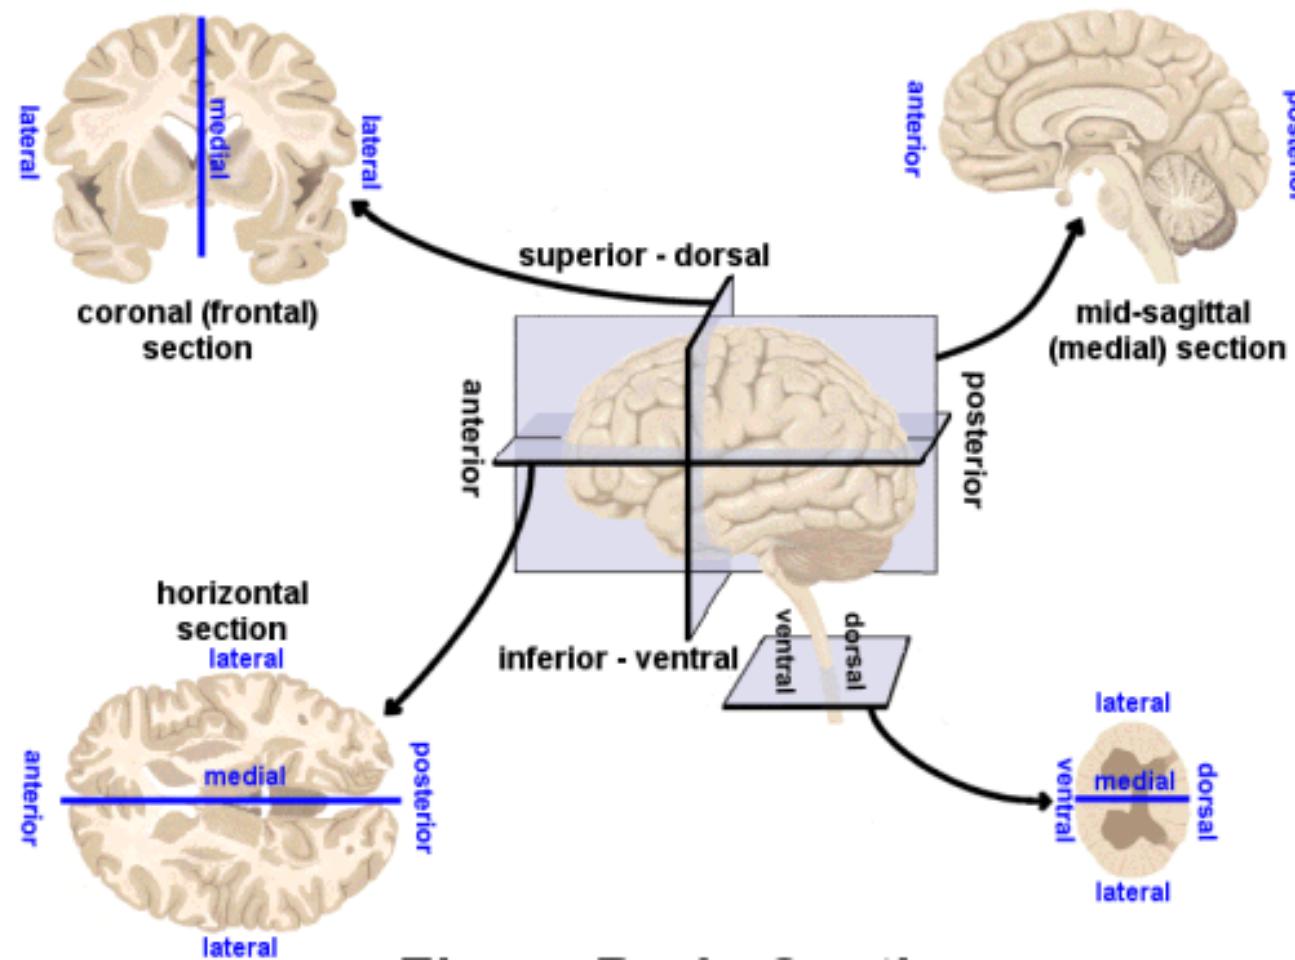

No matter how you slice it

Horizontal/Axial

Coronal/Transverse/Frontal

Sagittal (from the side)

Slice diagram

Supporting structures

Meninges

Ventricular system

Blood supply

Meninges

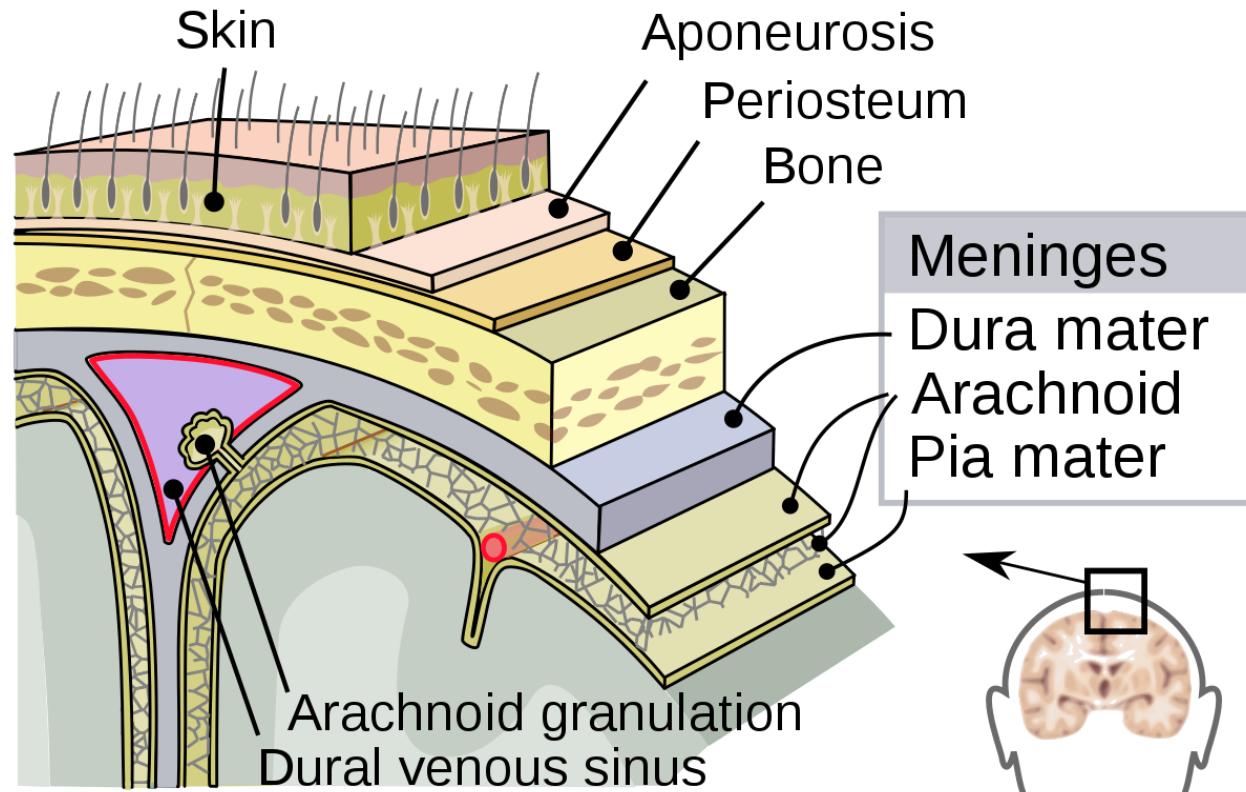

Dura mater

Arachnoid mater/membrane

Subarachnoid space

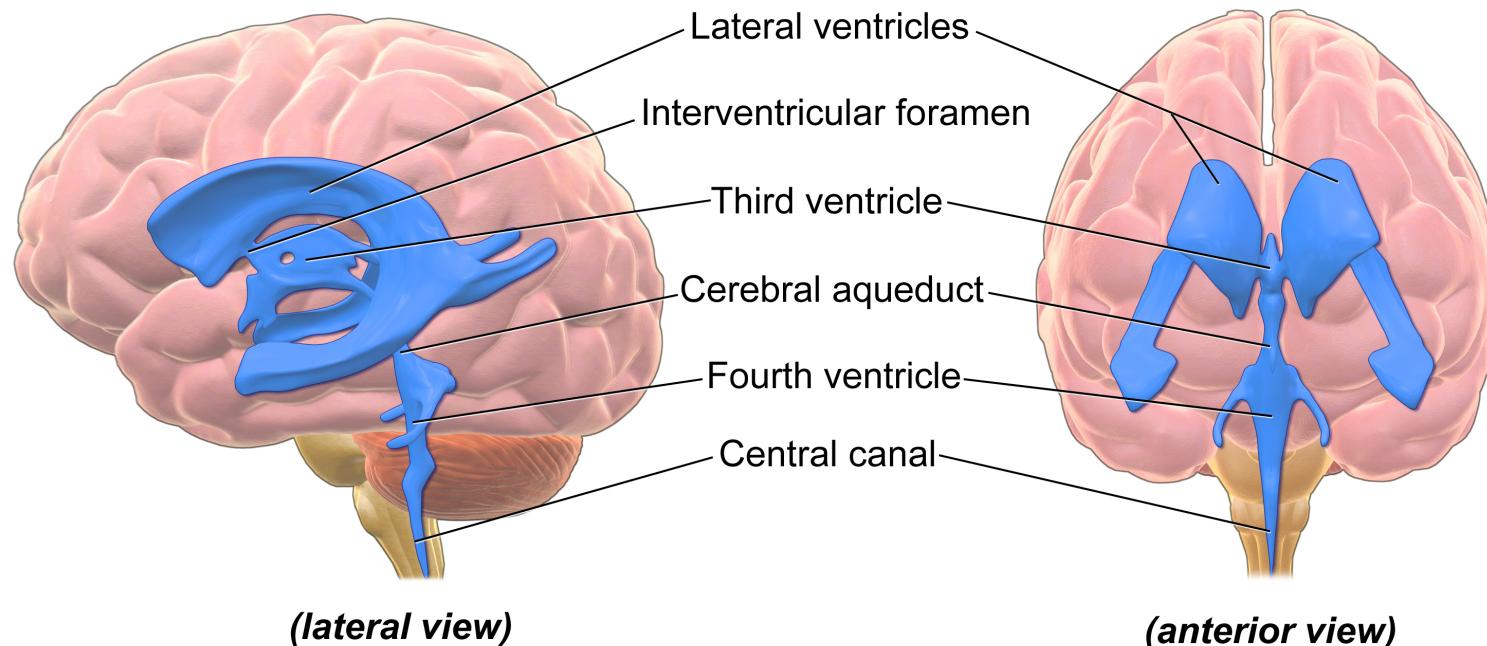

Pia mater

Meninges

<https://upload.wikimedia.org/wikipedia/commons/thumb/8/8e/Meninges-en.svg/1280px-Meninges-en.svg.png>

Ventricular system

https://upload.wikimedia.org/wikipedia/commons/d/d4/Blausen_0896_Ventricles_Brain.png

Ventricles

Lateral (1st & 2nd)

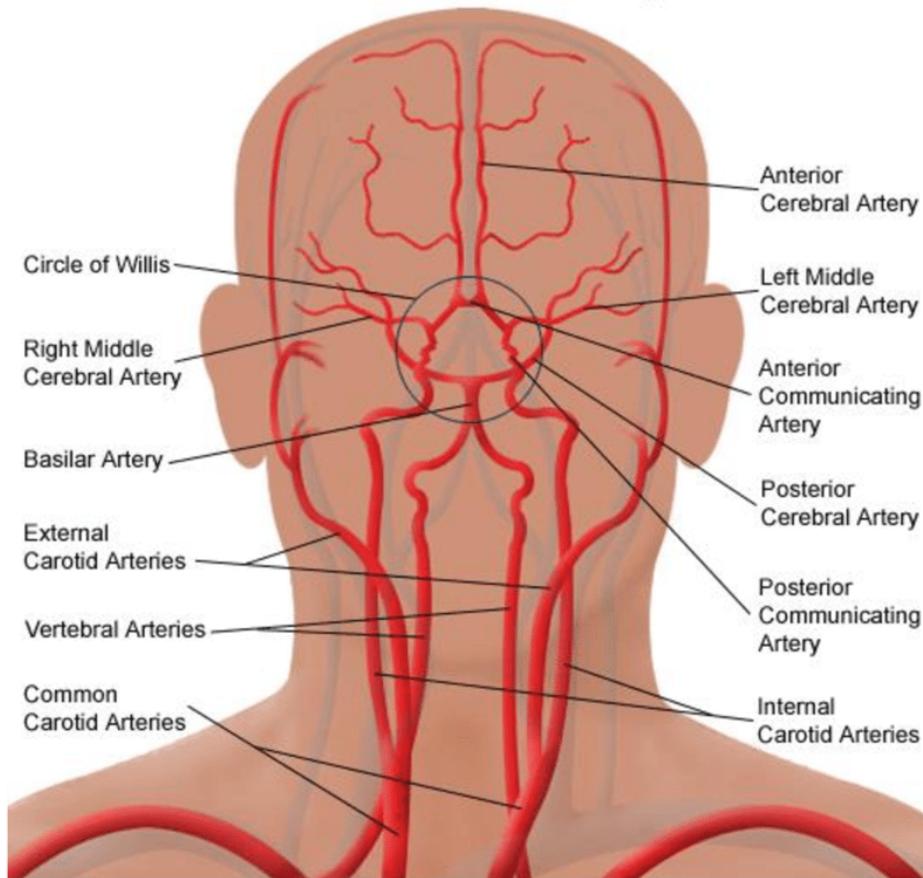

3rd

Cerebral aqueduct

4th

(are filled with) *Cerebrospinal fluid (CSF)*

Blood Supply

https://www.researchgate.net/profile/Yohannes_Mamo/publication/280830140/figure/fig1/AS:649635857174600/Organization-of-the-human-cerebral-circulation-The-brain-receives-its-blood-supply.png

Blood Supply

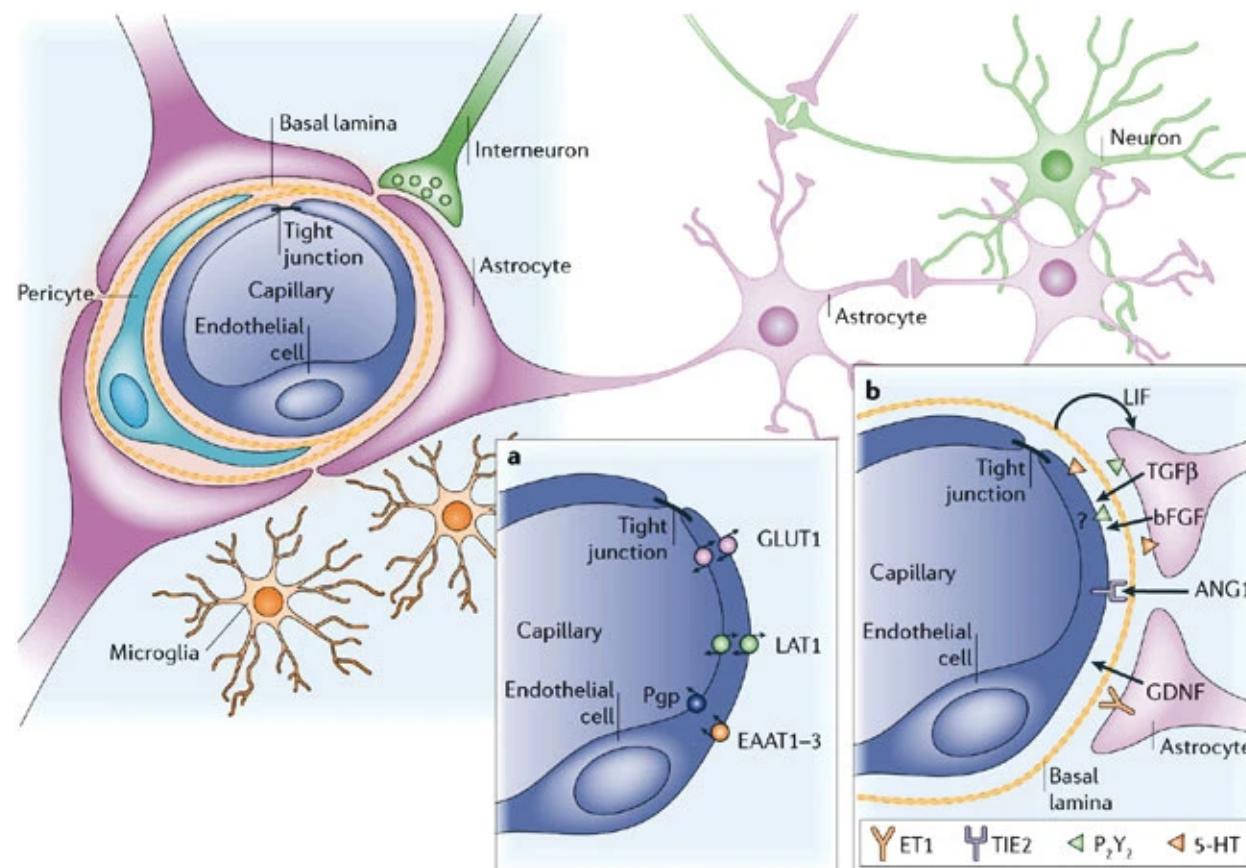

Arteries

- external & internal carotid; vertebral -> basilar
- *Circle of Willis*
- anterior, middle, & posterior cerebral

Blood/brain barrier

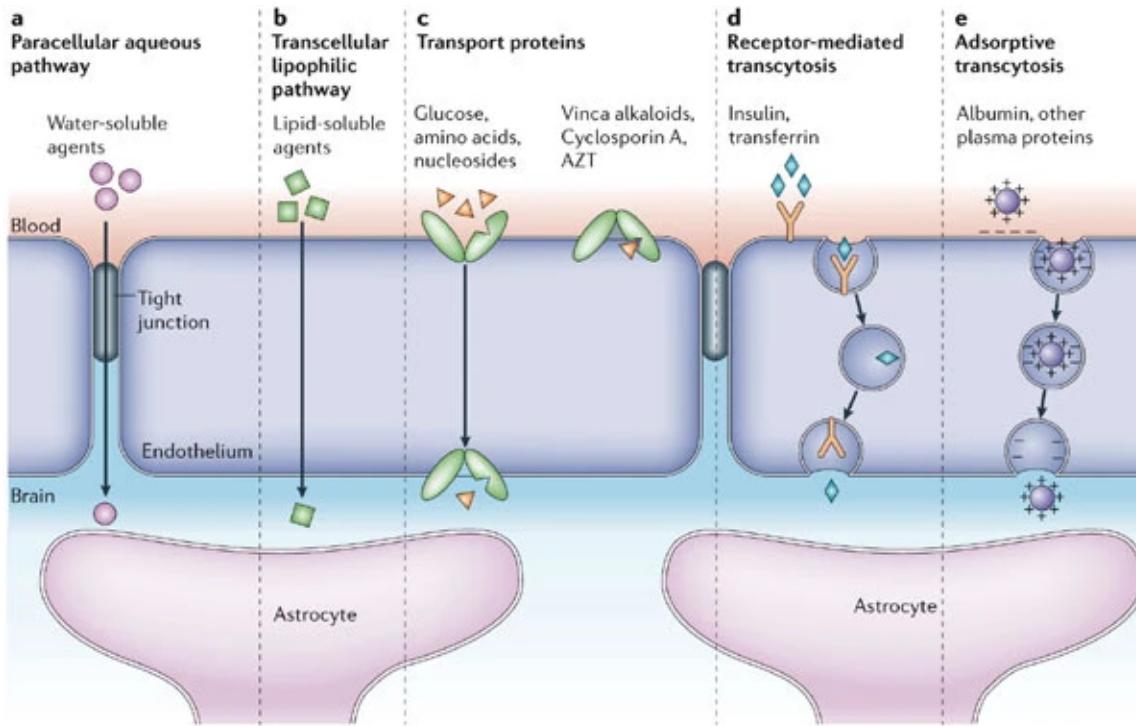

- Isolates CNS from blood stream
- Active transport of molecules typically required
- (endothelial) cells forming blood vessel walls are tightly packed

Blood/brain barrier

Nature Reviews | Neuroscience

(Abbott, Rönnbäck, & Hansson, 2006)

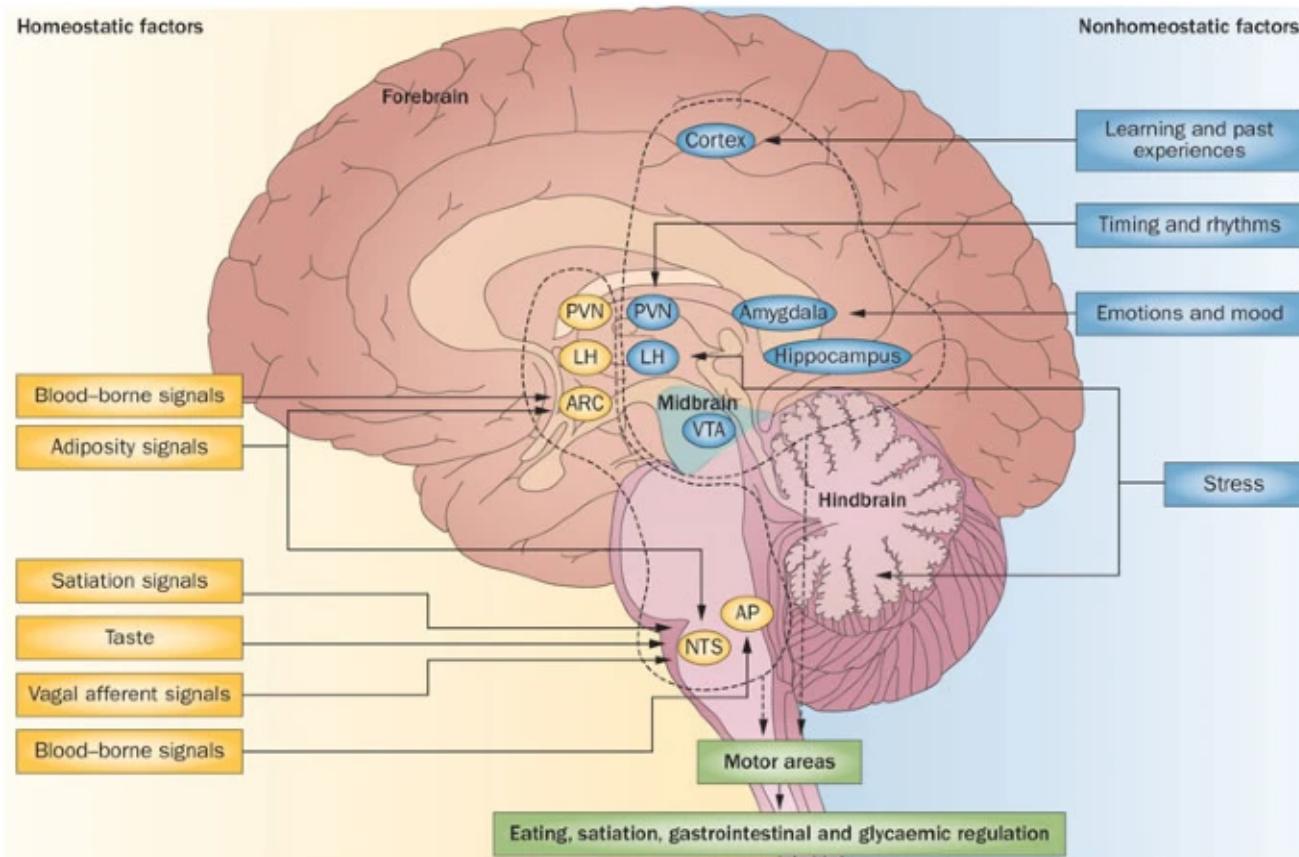

Copyright © 2005 Nature Publishing Group
Nature Reviews | Neuroscience

(Abbott et al., 2006)

exception is *Area Postrema*

- In brainstem
- Blood-brain barrier thin
- Detects toxins, evokes vomiting

Area Postrema

(Begg & Woods, 2013)

Organization of the Nervous System

Central Nervous System (CNS)

- Brain
- Spinal Cord
- Everything encased in bone

Peripheral Nervous System (PNS)

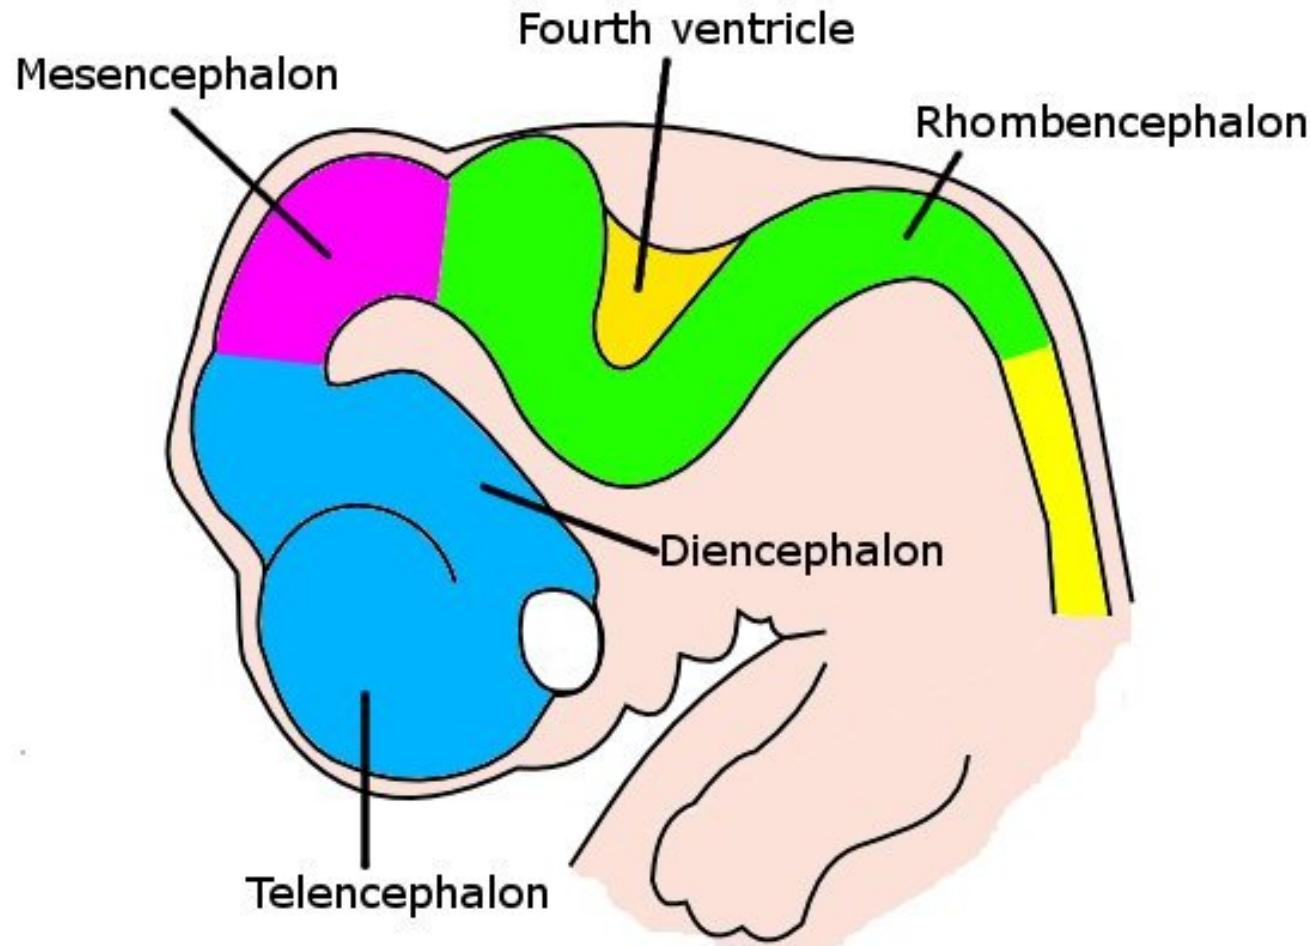

Organization of the brain

Major division	Ventricular Landmark	Embryonic Division	Structure
<i>Forebrain</i>	Lateral	Telencephalon	<i>Cerebral cortex</i>
			<u>Basal ganglia</u>
			<u>Hippocampus</u> , <u>*Amygdala*</u>
	Third	Diencephalon	<u>Thalamus</u>
			<u>Hypothalamus</u>
<u>Midbrain</u>	Cerebral Aqueduct	Mesencephalon	<i>Tectum, Tegmentum</i>

Organization of the brain

Major division	Ventricular Landmark	Embryonic Division	Structure
<i>Hindbrain</i>	4th	Rhombencephalon	<i>Cerebellum, pons</i>
	–		<i>Medulla oblongata</i>

Embryonic brain (~6 weeks gestation)
